SUMMARY

I am a Creative Full-Stack Developer and Software Engineer with over 2 years of experience in building scalable web applications and guiding students as a development instructor. Skilled in both frontend and backend technologies, with a strong focus on clean architecture, consistency, and elegant solutions. Adept at balancing technical expertise with creativity, ensuring every project is not only functional but also refined and user-friendly. Passionate about continuous learning and delivering high-quality results that add real value.

WORK EXPERIENCE

Front-End Instructor & Department Head

Ulearna Educational Centre - Kabul | August 2024 - September 2025

Designed and delivered courses in HTML, CSS, JavaScript, React, and Version Control for university and Professional students. Trained over 100 students, guided them in building practical projects, and introduced several to internship opportunities. In addition to teaching, led the Computer Department, overseeing curriculum design, mentoring instructors, and improving the overall learning experience.

WORK EXPERIENCE

Full-Stack Developer

Ulearna Technologies LLC - Dubai (Remote) | June 2024 - May 2025

Contributed to the development of the Reab e-learning platform as part of a collaborative team of over 25 professionals. Assisted in building frontend features with React and Next.js and supported backend API integration using Nest.js. Gained hands-on experience working with Swagger APIs and Dockerized environments, enhancing both my technical understanding and ability to collaborate effectively on large-scale software projects.

WordPress Developer & Graphic Designer

MOWJ (Mobile Tactic Pty Ltd) - Sydney (Remote) | Jan 2025 - Jun 2025

Contributed to the development of multiple business and directory websites as a contracted freelance specialist. Assisted in building and customizing WordPress websites using Elementor and custom coding, managed domains and hosting through cPanel, and implemented SEO and performance optimizations. Created high-quality graphics, photos, and videos to enhance website design and social media presence. This experience strengthened both my technical and creative skills, while enhancing my ability to deliver effective digital solutions within a collaborative, client-focused environment.

IT Technician Intern

TVET - Kabul | June 2022 - September 2022

Worked as an IT Technician Intern, providing technical support and troubleshooting for hardware, software, and network issues. Assisted in maintaining computer systems, installing software, and ensuring smooth operation of IT infrastructure. Gained practical experience in system maintenance, problem-solving, and technical support, strengthening my foundational IT skills in a professional environment.
