Pashto	Conversational
English	Fluent
Uzbeki	Basic

WORK EXPERIENCE

Software Engineer

First Rate Inc. (TX, USA) – Kabul Branch Office | Nov 2025 – Present

Developing the next generation of enterprise wealth management and reporting solutions used by top-tier banks and wealth management firms. Utilizing React, Next.js, and Material UI to construct secure, data-intensive dashboards that visualize complex financial analytics. Integrated frontend applications with SQL Server, WebFOCUS, and PHP backends to ensure accurate real-time reporting. Maintained code quality through established CI/CD pipelines.

WORK EXPERIENCE

Front-End Instructor & Head of Computer Department

Ulearna Educational Center – Kabul | August 2024 – September 2025

Designed and delivered courses in HTML, CSS, JavaScript, React, and Version Control for university and Professional students. Trained over 100 students, guided them in building practical projects, and introduced several to internship opportunities. In addition to teaching, led the Computer Department, overseeing curriculum design, mentoring instructors, and improving the overall learning experience.

CMS Developer & Technical Specialist

MOWJ (Mobile Tactic Pty Ltd) – Sydney (Remote) | Jan 2025 – June 2025

Spearheaded the full-stack management, customization, and deployment of complex WordPress and CMS architectures, including large-scale business and directory websites. Engineered high-performance platforms utilizing custom PHP coding and advanced theme modifications rather than relying on standard templates. Managed end-to-end database optimization, domain hosting via cPanel, and critical SEO refinements to drastically maximize web performance and platform security.

Full-Stack Developer

Ulearna Technologies LLC – Dubai (Remote) | June 2024 – May 2025

Contributed to the development of the Reab platform as part of a collaborative team of over 25 professionals. Assisted in building frontend features with React and Next.js and supported backend API integration using Nest.js. Gained hands-on experience working with Swagger APIs and Dockerized environments, enhancing both my technical understanding and ability to collaborate effectively on large-scale software projects.
